

Postdoc: pre- and post-quantum cryptosystems for IoT

The **GRACE** research group at **École polytechnique** (Paris*, France) is looking for a **postdoc**.

Subject: cryptographic algorithms for constrained devices (with a view to IoT).

Pre-quantum: more efficient public-key crypto with limited power and memory

Post-quantum: making anything at all!

Aim: working cryptographic algorithms for RIOT, an open-source OS for IoT.

Contact: Ben Smith (smith@lix.polytechnique.fr).
